

Calculating Statutory Redundancy Pay

To work out the number of weeks redundancy pay, cross reference the person's age with the years of service (up to a maximum of 20 years' service) and then multiply that number by the weekly salary (maximum weekly salary is currently £643). The current maximum redundancy pay a person can get is £19,290. These figures are reviewed and updated each year in April.

An employee must have two years' continuous service to qualify for a statutory redundancy payment.

For example a person with a salary of £200 aged 22 with 4 years of service will be entitled to two week's salary i.e. a total redundancy of £400. A person with the same salary, aged 30 with 5 years' service will be entitled to £1,000.
